## CAREER OVERVIEW

I am a software developer specializing particularly in building the frontend of web applications and websites, using a variety of tools Like Html, CSS or SASS, Bootstrap, JavaScript and react.js.

## CAREER OBJECTIVES

I am currently and actively looking for a role where I can use my skills to the advantage of the company, while having the scope to develop my own skills.

## EXPERIENCE:

## **Experience in the Software field**

In the one year of experience that I currently have on the software field I have created dozens of projects. Utilizing all my skills, Below are some projects that I have created from scratch

- E-commerce website with add to cart and remove from cart functionality, Built with react.js.
- An app that Generates a random advice on click, Built with react.js and fetching the data from a random advice API.
- A not so average calculator app where the user can change to their preferred theme from three different themes, I used Html, CSS and JavaScript to build this project.
- Several landing pages for businesses

## **Experience outside the software field**

- **Intern at Gwagwalada area council**

As an intern I was posted to the area of pension and I was responsible for calculating the amount of pension to be allocated to each pensioner, though I didn't handle the money directly. I learnt a great deal about teamwork as I was working with several other employees.

- **POS attendant**

I worked in Enugu state, Nigeria as a POS attendant where I dealt with large sums of money very often in millions seeing as the location not the office was in AKWATA, one of the largest fish markets in Nigeria. I was responsible for counting and depositing large sums of money into the account of customers, we were very cautious about getting counterfeit currency, so we counted each

note manually (by hand) where I developed a skill of knowing which note is counterfeit just by looking, and I also improved my team working ability.
